Project Design Phase-I
Proposed Solution

Team ID	PNT2022TMID46618
Project Name	Personal Assistance for Seniors Who are self-reliant
Date	15November2022

Proposed Solution:

S.No	Parameter	Description
1	Problem Statement (Problem to be solved)	Senior citizens who are in need of medicine reminder and self-assistance because they don't want to skip their intake of medicine
2	Idea / Solution description	Creation of the web application which remind the medicine name and time through a voice alert
3	Novelty / Uniqueness	Blind people can get to know their time of taking pills
4	Social Impact / Customer Satisfaction	The users are satisfied with the proper reminder and intake of pills
5	Business Model (Revenue Model)	By our web application the revenue can be made in the form of popping up of advertisements or by overlaying add from third party services
6	Scalability of the Solution	Vast number of people who are aged can be provided with portable devices to ensure their health conditions by consuming medicines at correct time using web application
